The amendment received 19 May 2005 has been made of record. Claims 1, 3-11, 13 and 15-17 are pending.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 5, 7, 13 and 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 and claim 5, through its dependency on claim 3 recite a "method for producing a film-like material made of a resin as claimed in claim1". This language makes it unclear as to whether claim 3 is intended to incorporate the method limitations of claim 1 or only the resin of claim 1.

Claims 13 and 15-17, through their dependence on claim 13, recite "(formula 6):" twice. The first occurrence is undefined.

Claim 7 recites a molecular chain length of 2850 nm. It is not understood how applicants can determine a molecular chain length to the nearest nm.

Appropriate clarification and/or correction is required.

Claims 4-6, 13, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Isozaki et al.

Isozaki et al disclose processes for the production of polyethylene films with c-axis/MD orientation coefficients of 0.78 to 0.93. These processes are taught as comprising a step of passing the film between a pair of nip rolls. Regarding the

limitations of instant claims 4 and 15, these are seen as taught at example 1 if the reference.

Claims 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
